

*I just want to kill the
data format problem
once and for all*

Kill the Data Format Problem

Daffodil - Kill the Data Format Problem

- Podling since Sept 2017
- 4 Apache Releases - most recent July 2019
- Technology Status
 - Being deployed in military cybersecurity systems today
 - More than 40 data format schemas available. Breadth of formats covering:
 - FINSERV - Card Transactions ISO8583, NACHA, Point-of-Sale TLOG
 - Supply-Chain - EDIFACT
 - Health Care - HL7
 - Military messaging - Link16, VMF, USMTF
 - Preliminary Integrations with NiFi, Spark
- Status: Community Building
 - The bad news: Existing PMC all work for Tresys 😞
- What have we been doing about it?
 - Presented at ApacheCon NA 2018, 2019, Apache DC Roadshow
 - Ready for new developers
 - 32 "Beginner" JIRA Tickets

Proposal to Sharks

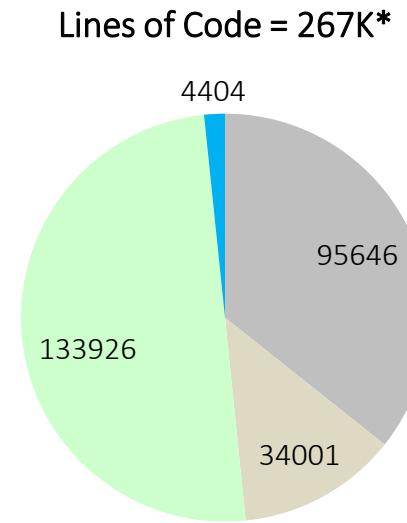

We are requesting

- 10 hours of devoted shark time to
 - Identify new developers
 - Spread the word about Daffodil to data-framework/data-centric Apache projects
- In exchange for a pledge of
 - Up to 40 total hours of virtual pair-programming hands-on training for new developers
 - Assistance to anyone in DFDL schema development for their data format
 - Eternal gratitude

Challenges in Recruiting Developers

- Daffodil is big and complex
 - Full-blown compiler for DFDL schemas
 - Efficient low-level runtime for parse/unparse
 - Learning curve is steep
- Know or Learn Scala
- Know or Learn XML Schema

- We need developers
 - undaunted by these challenges
 - motivated by the desire to *kill the data format problem once and for all.*

Cool Daffodil Ideas...

- Add support for pointer-based formats like TIFF and ZIP.
- Extend Daffodil with SAX-style event streaming
- Hybrid InfoSet
 - Daffodil directly constructs your framework-native data representation with tight metadata coupling
 - E.g., Spark Struct objects
 - Removes the XML/JSON conversion overheads
- Ultra-fast small-footprint backend for Daffodil
 - Generate C/C++
 - Generate FPGA for wire-speed parse/unparse
- Data-Format Debugger
 - Graphical display shows data and parsed tree and schema interactively
